Poznan University of Technology, Faculty of Technical Physics, Chair of Optical Spectroscopy; Nieszawska 13A, 60 – 965 Poznań, POLAND

Academic and Research Career:

1986 MSc – Adam Mickiewicz University, Poznań, Poland

2000 PhD – Adam Mickiewicz University, Poznań, Poland

2012 Habilitation – Faculty of Physics, Poznan University of Technology, Poznań, Poland

Speciality: physics – solid state spectroscopy

Activities: My scientific activity is focused on characterization of the rare earth doped crystals using optical spectroscopy methods such as absorption, emission, μ -Raman and Brillouin spectroscopy. My efforts have been specifically focused on systems with the up-converted luminescence and/or nonlinear optical NLO effects such as SHG and THG and their applications in new generation optical devices.

Memberships: Polish Society of Crystal Growth, Polish Physical Society.

Hobby: classical music
